

Welcome Message

Dear MOIS Stakeholders

I want to extend to each Stakeholders a very warm welcome to Madinat Al-Oloum International School(MOIS) . This school year has been a year of reaching attainable goals that were set before this school year commenced. This is a school year of working smarter and harder. And to top it all, this is a school year of bringing our dear school to the next level of success.

Aiming to meet the school vision – “Learn Today, Lead Tomorrow”. This vision is reflective of the school mission “Creating well -prepared individuals, cognitively and behaviorally while focusing on developing their psychomotor skills” . Guided by the school’s vision and mission, the teachers and the staff in collaboration with the parents and the community, all work hand-in-hand to make sure that all students become successful not only in the school, but in their lives as a whole

MOIS is a student-centered institution that promotes academic excellence through an enriched and rigorous American curriculum with an Islamic touch. It is our mission to develop the holistic aspects of each student. As one institution, we are here to support all of you, by any means necessary, to ensure that you reach your fullest cognitive, behavioral, and psychomotor potentials. MOIS looks forward to being with you, dear students, and to getting in touch with your parents and the members of the community that are relevant to your academic growth and development

To achieve the school beliefs and aims, and to meet the school expectations and the need for modern education in the changing times, the school was established with programs that follow an American curriculum and that is based on the Common Core State Standards.

To meet the school aims and to strengthen all the aspects of the school, the administration created various committees headed by competent staff members. The school collaborates these school aims and efforts to stakeholders by establishing the Parents’ Council and the Students’ Council to make all school stakeholders be aware of all these recent developments, and to make parents and students one of the main contributors of the school’s development

MOIS offers kindergarten to high school programs (K-12) that are based on the Common Core State Standards followed by American international schools. MOIS focuses on integrating programs based on American curricula and educational practices that enrich the Arab heritage and reflect the Islamic culture

MOIS prepares students for American standardized tests like the SAT and Subject SAT which would qualify them to get the American Diploma that will enable them to join most Arab and international universities according to their GPA and scores. Moreover, the school also offers IELTS course sessions specifically to grade 12 students because of the fact that most international universities require this standardized test in admitting students whose first language is not English.

MOIS also prepares students to respond to the future challenges of their college education; hence, the school requires students to prepare projects as final requirements for graduation. The computer department for instance required all graduating students to submit projects using vb.net or visual basic application for programming. Among these projects are (1) SAT Tansik Calculator, (2) A program that provides profiles for each member of the school including the students and the staff, and (3) Developing Windows application to help senior students choose a university.

As future leaders, the students are also required to join community services. Such services include hygiene and sanitation, helping the poor in the streets of Riyadh, and assisting and serving the entire community of the school such as the school library, the school laboratory, and the school staff rooms among other

It is our goal is to ensure that all students become critical thinkers, problem-solvers, readers, researchers, writers, and leaders. We do all of this to prepare you for the demands of the real-world so you may become productive citizens, become our future leaders, and contribute and/or give back something positive to the community.

To all of you who put trust in MOIS, We guarantee you that your children will receive the best education that they deserve.

Yours sincerely,

D r. Engr. Medhat Yousef
